## Introduction

No species on earth is more intelligent than humans as bestowed by the Supreme Lord with freewill. He created five cosmic elements to live comfortably on earth planet on a lease basis. for all living entities. Humans are different in the world because they are brainy but entangled in the materialistic world of three modes of nature (goodness, passion, and ignorance) and three attributes intelligence, mind, and false ego which make them to manifest differently for dormancy and influence on other species which are less intelligent, for self-gratification and survival. This makes them to commit blunders.

The good and bad deeds are bound to happen in this materialistic world and carried with a soul that transmigrates from one body to another as per the Law of Karma which is processed accurately in the spiritual world. The human form is very rare to obtain. Once obtain this platform, it should be utilized properly to rise to higher levels for liberation with sincere approach towards nature and living entities which are part and parcel and proper devotion to the Supreme Lord<sup>1</sup>.

The former American President Abraham-Lincoln wrote a letter to teacher “Teach him to be gentle with people, tough with tough people, every scoundrel there is hero that every crooked politician, there is a dedicated leader etc., this is the order, but see what best you can do. He is such a nice little boy and he is my son.”<sup>2</sup> Thus, one has to request God for behavioral transformations and false characteristics which need to be eradicated from one’s life, culture, acts of senses and benedictions are expressed in the form of a letter to God.
